## Details of Each Grade Indicator

### Current Standing

Knowing how many students are proficient is a measure of the school's overall success. Current Standing uses up to three years of student performance to provide a broader picture of school achievement. Current Standing also includes a measure of student growth (Value-Added Modeling) that looks at school size, student mobility, and prior student performance.

### Proficiencies Over Time

Students are performing on grade level with Proficient or Advanced scores.

**School Improvement**

School growth (Value-Added Modeling) compares overall student performance from year to year and considers the progress of all students whether or not they are proficient.

|              |                |             |
|--------------|----------------|-------------|
|              | <i>Reading</i> | <i>Math</i> |
| Growth Index | -0.56          | 0.23        |
| Points       | 1.45           | 2.96        |

Growth can be negative or positive. When it is positive, the school performed better than was expected when compared to other schools with the same size, mobility, and prior student performance.

**Student Growth**

Every student's prior test scores are used to estimate how they should have performed this year. Their academic growth is considered within two groups, the lowest-performing 25% of students and the higher-performing students (75%).

**Above Zero** This group performed higher than expected.

**Near Zero** This group performed as expected based on their academic history.

**Below Zero** This group performed below expectations, and students are falling behind when compared to their peers.

 Number of Surveys 3836

Students answer survey questions on topics such as classroom teaching and expectations of students. The survey contains 10 questions with answers from 0 (Never) to 5 (Always) for a maximum score of 50. For students in grades KN-2, a parent or family member completes the survey.

**Bonus Points**

Schools can earn points for reducing truancy, promoting extracurricular activities, engaging families, and using technology.

- Student and Parent Engagement
- Truancy Improvement
- Extracurricular Activities
- Using Technology

**Participation**

All enrolled students must take the yearly state tests. If a school tests less than 95% of their students, the school's letter grade is reduced by one grade.

#### Notes

School grading calculations and procedures are described fully in the School Grading Technical Guide posted on the PED's website at <http://ped.state.nm.us/SchoolGradingTechnicalGuide>. This guide provides definitions and decision rules for each indicator, including growth. In addition, the guide details how the state benchmark of C was established.

For Student Growth, separate procedures are used for the school overall and for the student groups. Therefore, the values for student groups will not sum to the total show under school overall.

A dash is used to protect student confidentiality as required by state and federal law when there are fewer than 10 students in a group.

Schools that administered tests by computer received bonus points based on the number of students participating.
